CoStar™

Overview

Fort Lauderdale Multi-Family

12 Mo Delivered Units	12 Mo Absorption Units	Vacancy Rate	12 Mo Asking Rent Growth
3,990	4,582	7.0%	0.2%

Fort Lauderdale's multifamily market remains fundamentally resilient despite an elevated wave of new supply, with steady demand helping to limit vacancy increases even as rent growth has stalled. The trailing 12-month absorption as of 2026Q3 is 4,600 units, down from the 4,450 units absorbed in 2024 but remaining meaningfully above the pre-pandemic annual average of roughly 2,700 units. Demand continues to absorb a large share of new deliveries, underscoring the market's underlying depth even as the vacancy rate has remained higher amid an active development cycle.

The vacancy rate has been relatively flat over the last year, around 7.0% as of 2026Q3. This is above the five-year low of 3.6%, although still below the U.S. average of 7.9%. Most vacancy pressure stems from the luxury segment, which captured a majority of positive demand over the past year and saw the vacancy rate improve from a 2024 peak of 11.6% to 9.1% today. Elevated competition from 4 & 5 Star supply and a slowdown in household growth have pressured the mid-tier segment, where the vacancy rate rose to 6.3%.

Development activity remains elevated despite a slowdown in deliveries. After a near-record 5,600 units in 2024, deliveries moderated to 3,500 units in 2025, yet the pipeline remains significant with 6,300 units under construction, representing a 4.3% inventory increase. Central Fort Lauderdale and Hollywood/Dania Beach have captured the largest share of recent deliveries, though construction starts have been highest in Weston and Davie over the past year.

Rent trends reflect mounting supply-side challenges. Asking rents average $2,360 per unit, maintaining a premium over the U.S. average of $1,770 per unit. However, annual rent growth slipped to 0.3% over the last 12 months, one of the weakest readings in a decade across all quality segments. Concessions remain widespread, with offers of up to two months free rent in supply-heavy submarkets.

Overall market vacancy is forecast to end 2026 at 7.4%, while annual rent growth is projected to end 2026 at 0.6%.

KEY INDICATORS

Current Quarter	Units	Vacancy Rate	Asking Rent	Effective Rent	Absorption Units	Delivered Units	Under Constr Units
4 & 5 Star	60,182	9.1%	$2,765	$2,605	594	286	5,650
3 Star	46,461	6.3%	$2,213	$2,156	107	0	687
1 & 2 Star	42,546	4.8%	$1,589	$1,564	52	0	8
Market	**149,189**	**7.0%**	**$2,362**	**$2,263**	**753**	**286**	**6,345**

Annual Trends	12 Month	Historical Average	Forecast Average	Peak	When	Trough	When
Vacancy	-0.6% (YOY)	6.5%	6.9%	8.4%	2009 Q1	3.6%	2021 Q4

Effective Rent Growth	-0.6%	2.5%	1.3%	19.1%	2022 Q1	-5.8%	2008 Q3
Sales Volume	$1.5B	$1.3B	N/A	$5.2B	2022 Q3	$154.5M	2009 Q3

Demand for apartments remains positive in Fort Lauderdale. Annual absorption totals 4,600 units as of the third quarter of 2026, down slightly from 4,400 units the same time last year, as household formation and job growth continue to slow. Still, this remains above the pre-pandemic average of about 2,700 units.

The vacancy rate has increased from historic lows of 3.6% in 2021 to 7.0% as of 2026Q3, but is relatively flat compared to last year. The vacancy rate in Fort Lauderdale remains below the U.S. average vacancy of 7.9% and other Florida markets like Tampa, Orlando, and Jacksonville.

Despite positive net absorption, the vacancy rate is expected to remain elevated as new supply continues to enter the market and economic headwinds weigh on household formation. Most of the recent and looming vacancy rate expansion has occurred in the luxury segment, though all quality tiers have seen an increase in recent years, and stabilized vacancy is trending above average.

While the development of 3 Star buildings is not widespread, the spillover of increased competition from elevated supply has led to the 3 Star vacancy rate reaching 6.3% as of 2026Q3. Lower-quality 1 & 2 Star apartments have also experienced challenges with absorption in recent quarters, resulting in the vacancy rate reaching 4.8%.

Going forward, demand is expected to remain steady at 5,100 units in 2026, but lag the expected delivery of nearly 5,300 units. Therefore, the vacancy rate is expected to end 2026 at 7.4%.

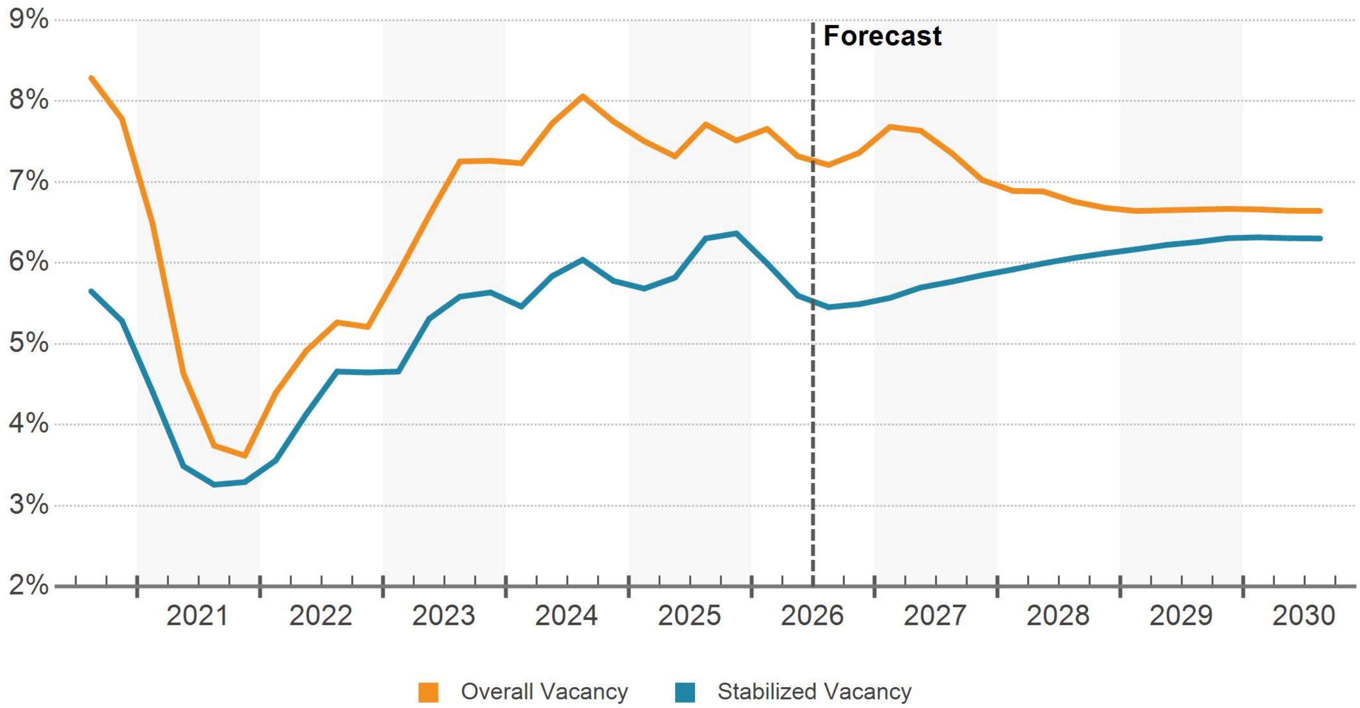
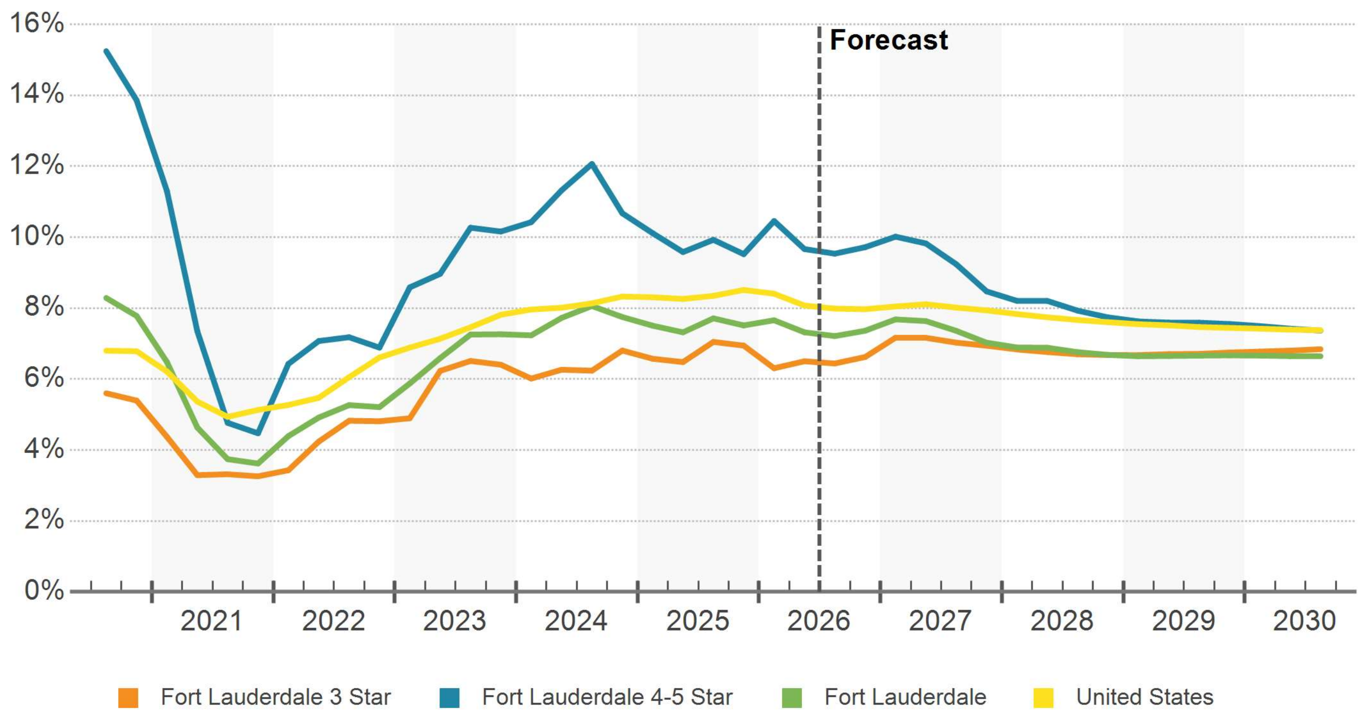
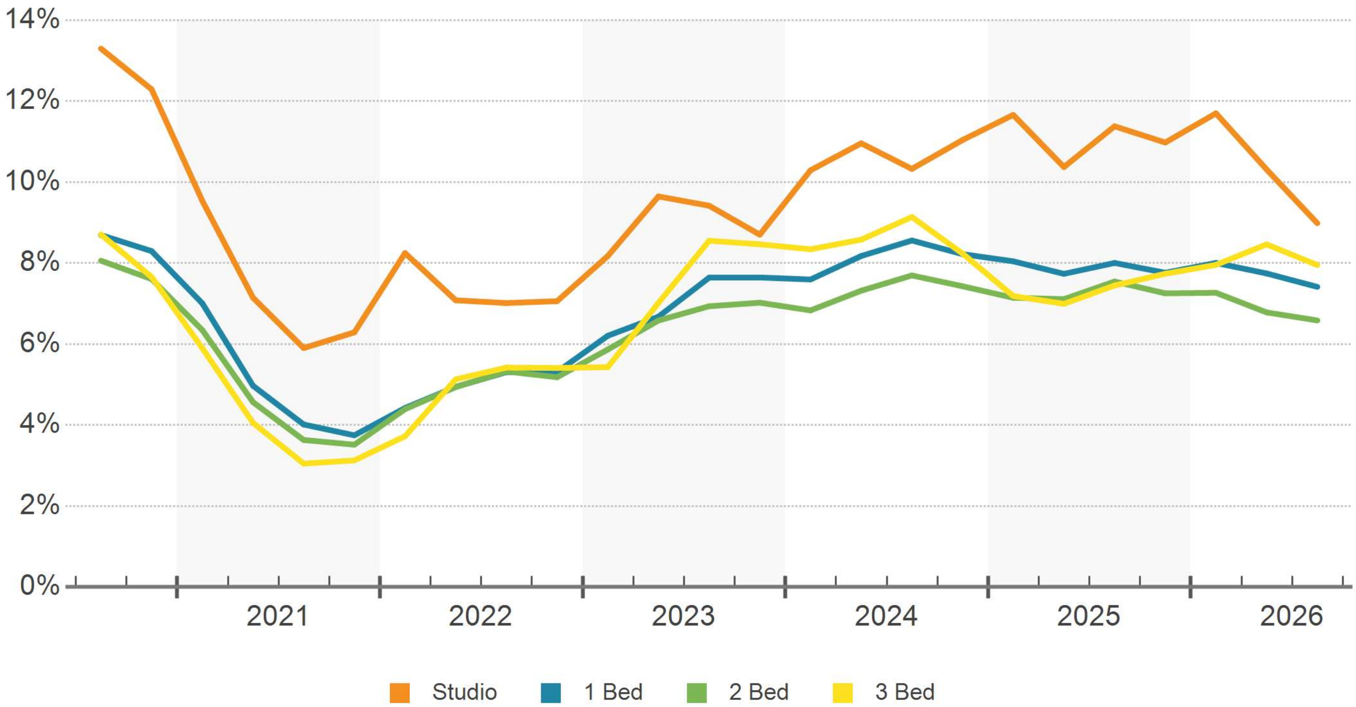
OVERALL & STABILIZED VACANCY



VACANCY RATE



VACANCY BY BEDROOM



Rent

Rent growth continues to decelerate amid persistent supply pressures, cooling demand, affordability constraints, and slower household formation. After surging in the immediate post-pandemic period, annual rent gains averaged about 0.6% in 2023 and 2024 but have since slowed to 0.3% in the third quarter of 2026, one of the lowest readings in the past decade and well below the five-year average annual growth of 4.0%. Asking rents average roughly $2,260 per unit in Fort Lauderdale, maintaining a premium over the U.S. average of $1,800 per unit.

Post-pandemic demand was eclipsed by a surge in new supply from 2022 through 2024, which weighed on pricing power, particularly in the 4 & 5 Star segment, where deliveries outpaced absorption for nearly 3 years. Concessions are widespread, reaching up to 2 months of free rent in supply-heavy submarkets and even appearing in stabilized properties, further eroding modest gains.

Luxury 4 & 5 Star properties, as well as mid-tier 3 Star assets, have experienced flat to slightly negative rent growth since 2023, currently standing at 0.0% and 0.4%, respectively. In contrast, the more affordable 1 & 2 Star segment recorded a modest 1.1% gain. Lower-tier properties, which rent at a significant discount to luxury units, are expected to continue outperforming in the near term. However, conversions of luxury properties to Live Local have pressured 3 Star performance, as these projects compete in lower-rent segments.

A softening economic outlook, particularly in higher-income sectors such as finance and technology, may further constrain luxury rental demand. Nonetheless, elevated home prices and mortgage rates are expected to limit homeownership, even among higher-income households, sustaining renter retention across all asset classes. South Florida's employment base, concentrated in leisure and hospitality, trade, transportation, and utilities, will likely exacerbate the gap between wage growth and rental rates.

Overall annual rent growth in the Fort Lauderdale market is forecast to end 2026 at 0.6% compared to the national average of 1.9%. Regarding the rent growth forecast by star rating, 4 & 5 Star rent growth is projected to end 2026 at -0.2%, 3 Star rent growth at 1.7%, and 1 & 2 Star rent growth at 1.3%.

Roughly 21,000 units were delivered in Fort Lauderdale over the past five years.Over 90% of these units were concentrated in the 4 & 5 Star segment. Following a near-record addition of 5,500 units in 2024, annual net deliveries have been 4,000 units over the last year as of the third quarter of 2026.

The construction pipeline remains elevated, with approximately 6,300 units under construction, which represents an additional 4.3% inventory expansion. Construction starts were around 3,400 units in 2024 and 3,800 in 2025. As of the third quarter of 2026, construction starts are 780 for the year.

More than half of the units delivered over the past five years and units under construction are concentrated east of Interstate 95. Following that trend, construction remains elevated in Central Fort Lauderdale. Approximately 1,600 units are currently under construction in the submarket as of the third quarter of 2026. Many of the units delivered since 2015 and currently underway are concentrated within a 3-mile radius of Las Olas Boulevard, an amenity-rich area with proximity to employment, beach access, and new or updated retail establishments.

Weston/Davie, west of I-95, has recently seen significant construction. Approximately 2,100 units are under construction in the submarket as of the third quarter of 2026.

Despite slowing employment and population growth, homeownership has been impacted by higher insurance premiums, rising maintenance costs in older condo properties, and a pandemic-induced surge in home values, making renting more attractive. The limited construction of single-family housing across South Florida, combined with elevated mortgage rates, further impacts home affordability, helping sustain demand for new luxury apartments and garden-style rental developments.

Investment activity in Fort Lauderdale has moderated from peak levels but remains in line with historical expectations. Annual volume totals $1.5 billion across 180 transactions as of the third quarter of 2026, up from the cycle low of $1.5 billion recorded in 2023. While this lags the record-level sales totals in 2021 and 2022, when double-digit pricing growth underscored investor appetite for multifamily properties, annual transaction volume is similar to the 10-year average of approximately $2.2 billion.

Buyers targeted every property quality segment, although the 4 & 5 Star segment accounted for the majority of total transaction volume in Fort Lauderdale over the past year. 20 4 & 5 Star properties traded hands totaling $851 million in the year with average transaction pricing of $360,000 per unit.

Despite the rapid appreciation in values over the past couple of years, softening fundamentals and higher interest rates have impacted pricing. The estimated market price per unit, which takes into account every unit in the market, not just those that transacted is $260,000 compared to $230,000 5 years ago.

Average transaction cap rates have risen from a three-year low of around 5.5% to 5.9% as of the third quarter of 2026. During that time period they have ranged from 5.5% to 6.3%.

There have been some large transactions in the last year. In April 2026, LeFrak Organization purchased the 337-unit Harbour at New River for $180 million, or approximately $534,000 per unit. The 36-story asset was completed in 2024 on 1.41 acres in downtown Fort Lauderdale along the New River waterfront. As a condition of the sale, the buyer agreed not to convert the units into condominiums until 2033. This acquisition represents LeFrak Organization's first purchase in Broward County and aligns with the firm's expansion strategy in South Florida, where it has been actively developing properties, including the SoLé Mia mixed-use community in North Miami.

Economy

People are drawn to the Fort Lauderdale region for its coastal lifestyle, favorable tax environment, international connectivity, and role as a business and population growth hub within South Florida. The market's economy is anchored by tourism, professional and business services, finance and insurance, trade and logistics, and marine-related industries, supported by strong in-migration and ongoing capital investment.

As of third quarter 2026, employment in the Fort Lauderdale MSA changed by approximately -5,600 jobs over the past year, reflecting a -0.6% change compared to 0.3% nationally. This brought total employment in the market to approximately 920,000 jobs, a change of about 82,000 jobs over the past five years. In the past ten years, 100,000 total jobs were added.

Employment in office-using sectors accounts for about 30% of all jobs in the region with around 240,000 total employees. Office employment in Fort Lauderdale is largely driven by professional and business services firms, finance and insurance companies, real estate and development firms, healthcare and life sciences organizations, and corporate/regional headquarters operations. Office-using employment has changed by -5,500 jobs (-2.2%) year-over-year as of 2026Q3 compared to -0.2% nationally. The industrial sector employs approximately 87,000 people, and changed by 430 jobs in the last year.

The region benefits from a diverse, highly skilled, educated workforce, with approximately 750,000 households and 2.0 million people. The median income in the region is $84,000, compared to $84,000 nationally.

Looking ahead, Oxford Economics projects Broward County employment to grow at an average annual rate of approximately 0.5% between 2026 and 2030, modestly outpacing the broader tri-county metro forecast. This outlook reflects slower national economic growth and a tightening labor market but remains supported by positive net migration and the county's ability to attract capital and talent. The Fort Lauderdale region unemployment rate is approximately 4.2%, compared to the national rate of 4.4%.

Overall, Fort Lauderdale's diversified employment base, continued population growth, and relative economic resilience position the market for steady expansion, even as broader macroeconomic conditions and affordability pressures shape the pace of growth in the years ahead.
